Re: Survey Descrepencies in Section 13, T15N, R6E, Adams County

Dear Mr. Sayler:

Enclosed is a copy of my CSM dated Aug. 13, 1979 and a plat of survey dated Sept. 2, 1979 and your CSM No. 274 dated July 16, 1974.

I was requested by Houslet Realty, the orginal subdivider of this parcel and Oscar Osimani, owner of Lots V and W of your CSM No. 274 to do work in this area.

I had no trouble finding the stakes you set (although the stakes had been knocked out along the road by the electric company). There is however a large descrepancy between the bearings and distances of the N-S lines of Lots U,V and W. For example: the west line of Lot W I found to be $N0^{\circ}37'W$, 978.69 feet and you have $N0^{\circ}01'54"E$, 970.584 and the west line of Lot U I find to be $N0^{\circ}49'W$, 977.95 feet and you have $N0^{\circ}01'54"E$, 972.68 feet.

These are such large differences that I believe you should be aware of them and take appropriate action.

If you have any questions, please write or call.

Very truly yours,

Kenneth G. Carlson RLS 742
