Dear Tony:

Enclosed is a copy of the revised survey in NE $\frac{1}{4}$ -NE $\frac{1}{4}$ , Sec. 21-16-7.

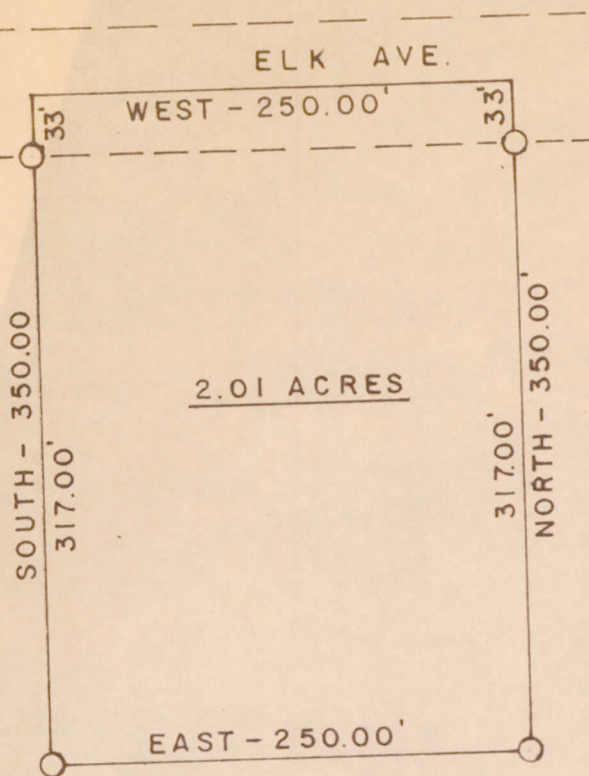

I did have the benefit of Sam Mullen's survey and found the yellow paint in the road north of his northeast corner pipe and also the same type of yellow paint at the intersection of the town roads near the northeast corner of the section, which was assumed to be the corner since he had used the same type both places. If I had carefully measured back from the NE corner of his staked lot rather than a <sup>500</sup>stadia check I would have discovered the difference, however I did assume the painted point was correct and used this as my corner, marking it with a PK nail for future use if needed.

The area between the two parcels has been added to the parcel I originally surveyed with only minor other changes to keep his land 350 feet deep.

Sincerely,

  
Herman Holzmilller
