#### BASIS FOR MONUMENT LOCATION

Show info such as: History of corner, with reference to Vol. and pg., dates, surveyor; exact description of monument replaced; if location computed, by taped or EDM traverse; landowner remarks, etc. (Use reverse side if necessary)

No record of any resurveys. This corner is set on a straight line and equidistant between the monument at the SE corner of this Section and the SW corner of this Section.

The theoretical, corner was set as follows:

The North line of the NE½ of this Section was extended and doubled to the West to establish the NW corner of this Section. The line and distance from the theoretical NW corner to the W½ corner was doubled and extended South to establish the theoretical SW corner of this Section. This gives us dimensions all the way around the Section which are quite compatible with the original government survey notes.
